About Avaris

Avaris was founded to revolutionize packaging through sustainable, eco-conscious design — without sacrificing function for the sake of it. We design and manufacture protective packaging, cushioning, mailers and cold-chain formats for brands that care how their products arrive, and what happens to the packaging afterward.

Protect. Preserve. Sustain.

Protect

Packaging specified to the product, not off a generic template — sized and cushioned to cut damage in transit and reduce returns.

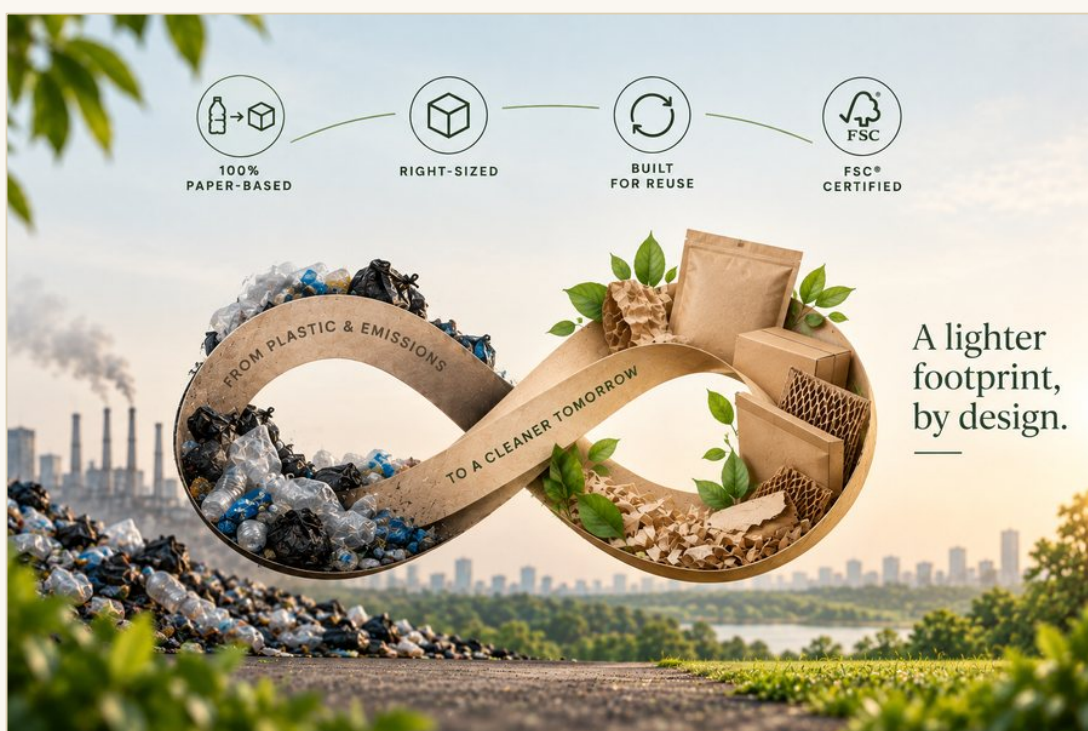

Preserve

Insulated and cold-chain formats keep perishables, pharmaceuticals and meal-kits within range from dispatch to doorstep.

Sustain

Recyclable, FSC-certified paper products, right-sized to cut void-fill and excess material without cutting protection.

A lighter
footprint,
by design.

What we make

Products across categories, built around how goods move.

Honeycomb Mailers

BESTSELLER · MAILERS & EXPANDABLE BAGS

Six-layer honeycomb padded mailer, built to absorb the bumps of a normal transit journey.

Honeycomb Mailer+

EXPANDABLE · MAILERS & EXPANDABLE BAGS

Honeycomb Mailers with a bottom gusset — same cushioning, room for thicker or multi-item orders.

Honeycomb Paper Rolls

ZERO-WASTE WRAP · WRAPPING & CUSHIONING

A honeycomb paper roll that unrolls around the product, shaped to whatever's inside.

HexSleeves

SNUG FIT · WRAPPING & CUSHIONING

Expandable honeycomb sleeve that conforms around bottles, jars and similar shapes.

Cloud Mailers

LIGHTWEIGHT PICK · MAILERS & EXPANDABLE BAGS

Our paper bubble mailers — a paper-based stand-in for plastic bubble mailers.

What we make

Continued — five more formats across protection, cold-chain and everyday shipping.

CloudMailer+

EXPANDABLE · MAILERS & EXPANDABLE BAGS

The gusseted paper bubble mailer — same lightweight cushioning, with room to spare.

ChillCell Pads

COLD-CHAIN · CHILLED PADS

Better insulation by design — a double-honeycomb layer inside holds temperature for cold-chain and perishable shipments.

Fluted Mailers

EVERYDAY ESSENTIAL · PRODUCT PROTECTION

Corrugated paper mailer built for items that can't afford to bend or crush in transit.

KraftMailer

REGULAR PAPER MAILER · MAILERS & EXPANDABLE BAGS

A straightforward kraft paper mailer for documents, apparel and everyday shipments — flat profile, no gusset.

SOS Bags

CUSTOM BRANDING · PRODUCT PROTECTION

Square-bottom paper bag with twisted or flat handle options, sized to order.

Custom features

Manufacturing options available across our product range — mix and match to the shipment.

Single adhesive strip

Double adhesive strip

Perforated tear-line

Bottom gusset

Industries we serve

The same core materials, specified differently depending on what's shipping.

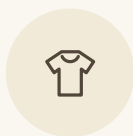

E-commerce & Retail

Cold-Chain Solutions

Pharma & Nutraceutical

Fashion & Apparel

Cosmetics & Beauty

Electronics & Print Media

Gifts & Stationery

Home Décor

Subscription Boxes

Logistics & Fulfilment

Sustainability, built into the spec

Sustainability isn't a separate line item — it's a question we ask at the material and sizing stage, before anything goes into production.

100% sustainable paper products

Every material we specify is paper-based and designed to move through standard recycling streams.

Right-sized, not oversized

Packaging sized to the product cuts void-fill, dimensional shipping weight and material use together.

Built for reuse where possible

Formats like our mailers and cushioning are designed to hold up for a second trip, not just one.

FSC® certified

Our paper-based materials are sourced from FSC-certified suppliers, so the chain of custody holds up.
